

TECHNICAL BULLETIN

PROVEN

PROVEN is a powerful oven cleaner formulated to remove "baked on" soils, carbon and greases that are commonly found in kitchen ovens. **PROVEN** combines all the safety features such as non spattering, quick action which is essential in a product representing one of its kind.

FEATURES

Will clean baked on greases, carbon and all kinds of oily soils that is commonly found in oven grilles and fryers. Combines a synerfistic rate of alkalinity with detergency which ensures rapid penetration, suppornification and emulsification of fats and greases.

Safe to use on iron, stainless steel, porcelain and glass.

Phosphate free concentrated product.

HOW TO USE

Cover exposed electrical connections and temperature recorders. Spray **PROVEN** on to the warm surfaces 80° - 100°C. Allow **PROVEN** to attack soil for about 10 minutes. Remove all residues, rinse out surfaces using a diluted mixture of water with vinegar. Sponge rinse to remove all fat residues. All clean items should be lightly covered with vegetable oil before using.

For tough work, use concentrated. With other jobs, **PROVEN** can be used at dilutions of 1:1 or 1:4 depending on the soil condition. Store **PROVEN** in a cool environment.
