

TECHNICAL BULLETIN

QUEST

Liquid machine dishwashing detergent specially designed using chemical matrix to work under all kinds of conditions.

FEATURES

- Outstanding cleaning properties - keeps machines and wares sparkling clean.
- Stain control without the use of chlorine - silverware will not be detarnished and corrosion within machine systems will not be accelerated.
- Completely biodegradable - will not create environmental pollution.
- Controlled operational costs - product is dispensed through PROTEK's accurate feed detergent feeders

CHEMICAL PROPERTIES

QUEST is formulated from a combination of polyhydroxycarboxylates, corrosion inhibitors and soil emulsifying agents. This organic system represents a first in chemical warewashing. The product is low foaming and works well under all water conditions.

N.B.:

QUEST IS ALKALINE AND IS NOT TO BE USED FOR MANUAL WASHING.

TECHNICAL BULLETIN

HOW TO USE

QUEST is dispensed through PROTEK's accurate feed system. These modern precision proportioners will ensure **QUEST** is used economically keeping operational costs well controlled.

<u>Water Hardness</u>	<u>Temp.</u>	<u>Water Pressure</u>	<u>Concentration of Quest</u>
50 ppm	45 - 50°C	15 – 20 p.s.i.	0.5 – 1.0 gms per liter.
50 ppm			
75 ppm	45 - 50°C	15 – 20 p.s.i.	1.0 – 1.5 gms per litre.
